Exclusively available from:

Introduction

Exclusively available from MB Architectural in Northern Ireland, the **sembra** range is an intelligent programme created by UK design group A.S.K.

This component system establishes a new direction for architectural ironmongery by launching an original method of constructing door furniture.

Products are built-up around a core, or node, the piece that joins the handle to the door - which offers a variety of finishes:

SS and PS finishes have a patented node.

MA incorporates "silver" nodes.

ST, SP and AS - different handle/node combinations of stainless steel and/or aluminium.

All handles are factory assembled using patented, military specification, self-locking thread form fixings. Hence **sembra** designs conceal strength and durability while the proportion and detailing of the node, tip and lever ensure that this minimalist range will become a design icon.

Key to finishes:

SS Satin stainless steel.

PS Polished stainless steel.

MA Anodised aluminium.

ST Satin stainless steel with sembra node to match.

SP Polished stainless steel with sembra node to match.

AS Anodised aluminium with sembra node to match.

MB Architectural is part of Macnaughton Blair Architectural Division. MB Architectural can schedule your project requirements with all items adhering to the latest British and European standards as well as meeting the requirements of building regulations and of course BS 8300.

The Architectural Division specialises in a complete solution, incorporating not just the door furniture but also the mechanical and electrical items required to ensure we meet the buildings design and security needs.

Extensive group wide stocks and our own in-house master keying facility offers the client security and gives us flexibility in meeting the most demanding delivery schedule with a comprehensive range of locking options from entry level through to very high security cylinders.

Also available group wide is the supply and installation of access control and door automation products as well as signage and wayfinding scheduling, anti-ligature hardware, mail systems and bespoke hardware products.

The **sembra** range of door furniture is only one aspect of our offer and we would encourage you to contact us or visit our website for further information regarding other ranges and finishes.
